

JB Rubber Ropes

Standard Sizes:

Diameter	Type	Length	Coil per carton
3/8" Diameter	Solid	150'-600'	1-4
3/8" Diameter	5 mm hole/Hollow core	100'-300'	1
7/16" Diameter	Solid	150'-600'	1-4

Rubber rope is designed to complement the JB Tie down range is a versatile and flexible solution for large and irregular loads and application; typical in lumber, farming, garbage and mining applications.

Rubber rope is designed to be coupled with J hooks to make custom length tie downs. .

The rubber ropes are offered in both Natural rubber and EPDM to meet individual customer needs.

- Natural rubber offers high tear resistance, superior elongation and low temperature flexibility for the most demanding applications.
- EPDM offers the same high strength and but extended weather resistance and ideal for applications with long term outdoor exposure.

Rubber Rope – Double Eyelet Hook Installation

STEP 1: Insert a 4"-5" length of rope through the eyelet closest to hook.

STEP 2: Now loop inserted length of rope back down through second eyelet, leaving enough slack so a loop is formed.

STEP 3: Insert end of rope back through the loop formed in step #2, leaving at least 1" extending.

STEP 4: Tighten and secure knot by holding hook and pulling on long end of rope to remove slack and tighten knot..
